Professional Summary

Full-stack and backend developer with expertise in Python, Flask, React Native, and PostgreSQL. Strong background in RESTful API design, database optimization, and microservices architecture. Experienced with Docker and DevOps fundamentals. Seeking junior backend engineer or full-stack developer position.

Technical Skills

Languages: Python, JavaScript/TypeScript, C, Java

Backend & Web Frameworks: Flask, Django

Frontend & Mobile: React, React Native, HTML5, CSS3, Expo

Databases: PostgreSQL, MongoDB, MySQL

DevOps & Infrastructure: Docker, Kubernetes fundamentals, Linux, Git, GitHub, CI/CD concepts

Other: RESTful APIs, JWT/OAuth 2.0, Microservices, Postman, VS Code

Professional Experience

Full-Stack Developer | Personal Projects (June 2024 – Present)

School Management System (React Native + Flask + PostgreSQL) — Built cross-platform mobile app using React Native/Expo and Flask backend with JWT authentication.

Finance Tracker Web App (Flask + React + PostgreSQL) — Developed full-stack financial tracking application with REST APIs for transaction management and real-time analytics.

Health Tracking Application — Created health monitoring app with persistent storage, authentication, and API endpoints for historical data analysis.

Education

B. Tech Computer Science | SSM COLLEGE OF ENGINEERING | 2023-2027

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, System Design, Web Development, Microprocessor Architecture, Python, Java

Technical Certifications

Full-Stack Development • Docker Fundamentals • Linux Administration • Git and GitHub

Core Competencies

Full-stack development • Backend API optimization • Microservices architecture • RESTful APIs • Mobile development • DevOps/Docker • Authentication/Security • Git version control • Agile practices
