Professional Summary

AI Engineer and Full-Stack Developer with hands-on experience building production-deployed LLM-powered applications, RAG pipelines, and multi-step agent systems. Proficient in TypeScript, Python, React, Node.js, and Express. Experienced with PostgreSQL, Supabase, JWT authentication. Seeking an AI engineering or full-stack developer role to build production-grade AI systems.

Technical Skills

AI / LLM	Gemini API, LLM Tool Calling, RAG Systems, Vector Embeddings, Agent Orchestration
Languages	Python, JavaScript, TypeScript, C, Java
Backend	Express.js, Flask, RESTful APIs, JWT Authentication, OAuth
Frontend & Mobile	React.js, React Native, Expo, Tailwind CSS, HTML5, CSS3
Databases	PostgreSQL, SQLite, MongoDB, Prisma ORM, Supabase
DevOps & Tools	Railway, Vercel, Docker, Kubernetes (fundamentals), Git, GitHub, Postman, CI/CD

Projects

FinanceAI – AI-Powered Personal Finance Agent *TypeScript, React, Express, Gemini API, Supabase, PostgreSQL, Railway, Vercel* 2026

- Built and deployed a fullstack AI agent that parses natural language expenses, analyzes spending, and delivers grounded financial advice using Gemini 2.5 Flash with multi-step tool calling and a 3-tier model fallback chain for rate-limit resilience.
- Implemented a RAG pipeline from scratch — chunked a financial knowledge base, generated embeddings via gemini-embedding-001, performed cosine similarity retrieval, and injected grounded context into advice prompts.
- Engineered 6 agent tools including proactive budget warnings that fire automatically after every expense save, and a PDF bank statement ingestion pipeline using pdfjs-dist with Gemini-powered structured extraction. **Live:** finance-agent-one-azure.vercel.app

SkillsSync – Peer-to-Peer Skill Exchange Platform *React.js, Express.js, PostgreSQL, Prisma ORM, JWT*

- Built a full-stack skill-sharing platform where users can list skills they offer and request skills from others, enabling peer-to-peer knowledge exchange.
- Designed and managed a PostgreSQL relational database with Prisma ORM for type-safe queries and schema migrations.
- Developed a RESTful Express.js API with endpoints for skill listings, user matching, and exchange management.

Tasks App – Full-Stack Web & Mobile Application *React.js, React Native, Express.js, PostgreSQL, JWT*

- Developed a cross-platform task management app with a shared Express.js REST API backend serving both web (React.js) and mobile (React Native/Expo) clients.
- Implemented JWT-based authentication and authorization for secure user sessions.
- Deployed web client live at photocircle.vercel.app; source available on GitHub.

Education

B.Tech in Computer Science

2023 – 2027 (Expected)

SSM College of Engineering, Srinagar

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems

Certifications: Linux, Git and Github, Python, Docker, K8s
